Ms. Lynn Medlin
Allied Environmental Signage
69 Megill Road
Farmingdale, NJ 07727

Dear Potential Client,

I was primary project manager on the IFB with day to day contact with Lynne Medlin, Clara Wasshem and Kim Rasmussen. The \$710,000.00 project went off without a hitch and was more successful than a few of my \$7,000.00 projects.

Lynne, Clara and Kim were always reachable. Whenever I requested a conference call, it was always "when do you have time". If I had to call with a question or issue, the immediate response was "we will take care of it", I never had any doubt it would be done. Their responsiveness to our needs was always polite and immediate. The one instance we required immediate on-site attention, someone was here within 24 hours.

Director is a Building Inspector, and is very critical, he was very complementary regarding the materials, construction and overall end product Allied produced for us.

Crew were all polite and courteous to our faculty, staff & students. Never a negative comment from anyone regarding the logistics of the entire installation over 850,000 square feet at 3 locations.

I'm happy to recommend the product and services of Allied Environmental Signage for your next project.

Sincerely,

Sherri D. Meier

Facilities Project & Procurement Coordinator
